DETAILED ACTION

Response to Amendment

1. The claim listing and abstract should have been submitted on separate sheets of the amendment document required by 37 CFR 1.121. The amended abstract should be submitted correctly for proper entry and future correspondence must comply with 37 CFR 1.121.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The method claim is dependent upon a product claim.

Claim Objections

4. Claims 11 and 12 are objected to because of the following informalities: "HCLO" should read -HClO—in claim 11 and "MG(OH)₂" should read -Mg(OH)₂— and insert -and-- in claim 12. Appropriate correction is required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malchesky. Malchesky discloses an irrigating medium comprising an electro-chemically

activated, aqueous saline solution, which includes both an aqueous predominantly anion-containing solution and a separate aqueous predominantly cation-containing (column 2 lines 10-18). The claimed pH ranges of the solutions, and activated radical species are known to one of ordinary skill in the art. It would have been an obvious matter of choice to one having ordinary skill in the art as to the claimed approximate value of the redox potential of the solutions. The specific redox potential values are not disclosed as critical to the claimed invention. The medium is capable of being used as a root canal irrigating medium.

Allowable Subject Matter

7. Claims 3-7, and 9 are allowed. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

8. Claim 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments filed May 24, 2004 have been fully considered but they are not persuasive. It is believed that the pH and redox potentials are not novel to the products of electrolytically activated solutions. The specification does not disclose that claimed values are critical to the claimed invention.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
